VOL. 1 - ISSUE 2

WHERE CRAFTSMANSHIP MEETS ART

At Don-Bar , every fireplaces is the result of meticulous craftsmanship, innovating engineering, and a passion for design.

From the first cut of steel to the final finish, our team is dedicated to creating fireplaces that are as beautiful as they are durable. We blend precision manufacturing with artistic vision to deliver products that elevate unique architectural spaces and exceed expectations.

For customers seeking a truly personalized touch, our skilled artist hand-paints custom fireplace façades, transforming each piece into a one-of-a-kind work of art.

Every hand-painted finish is carefully crafted to complement the customer's vision and create a fireplace that is both functional and uniquely expressive. Our artists hand-paint custom fireplace facades, transforming functional steel into unique architectural features.

Don-Bar Visits Marietta, Georgie

Strengthening Partnerships with The Fireplace Company

At DON-BAR, every dealer relationship is built on trust, collaboration, and ongoing support.

As part of our commitment to strengthening our North American dealer network, our team recently visited The Fireplace Company in Marietta, Georgia. With more than 30 years of experience serving North Georgia and the greater Atlanta region, The Fireplace Company has earned an outstanding reputation for quality craftsmanship and customer service.

The visit provided an excellent opportunity to present the DON-BAR product collection, exchange ideas, and introduce

a dedicated showroom display designed specifically for architects, designers, and contractors.

MEET OUR PARTNER

Established in 1991, The Fireplace Company continues to be a respected second-generation family business serving homeowners and design professionals throughout North Georgia.

We were pleased to meet Kathy and her team, whose passion for customer service and industry expertise reflects the same values that drive DON-BAR every day.

STEELE SHAPED BY EXPERTISE

Every DON-BAR fireplace begins with precision steelwork and the dedication of our skilled team. Each component, including our custom fireplace hoods, is carefully formed, finished, and inspected to ensure exceptional quality, durability, and design.

Precision Measurements for a Perfect Fit

Proper measurements are essential when installing a DON-BAR fireplace. Accurate height and length measurements of the table base, combined with the dimensions of the freestanding glass panels, ensure a perfect fit and a seamless final result. Taking the time to verify every measurement during installation helps maintain the precision, balance, and elegant design that define a DON-BAR fireplace.

A Visit to Biltmore Hearth and Home – North Carolina

“Details Make The Difference. The Look of Luxury, The Warmth of Home.”

During our recent visit to North Carolina, we had the pleasure of meeting Bo, owner of Biltmore Hearth and Home, along with his dedicated team in Mills River, near Asheville.

Biltmore Hearth and Home specializes in helping homeowners select the ideal hearth products for their homes, combining both form and function. From concept to completion, their team provides expertise and guidance while offering a wide selection of premium fireplace products, stoves, gas logs, and outdoor cooking solutions.

We were proud to assist in the installation of a beautiful DON-BAR 9000 in their showroom, creating a stunning display for their contractors, designers, and customers to experience. This installation will allow their team to showcase the unique design, quality, and performance of a DON-BAR fireplace while inspiring new projects and custom applications.

We truly appreciated the warm welcome from Bo and his team and look forward to building a strong partnership with Biltmore Hearth and Home as we continue bringing exceptional fireplace experiences to homeowners.

Behind the Flames

DON-BAR 9000 Installation:

Precision from Start to Finish.

During our discussions, many important questions regarding the installation of the DON-BAR 9000 were reviewed and clarified. A successful installation begins with a certified professional installer, a thorough understanding of the installation manual, and proper follow-up and support from the manufacturer.

Attention to detail is essential, from ensuring the ceiling supports, glass panels, table, and all components are perfectly level and accurately measured.

While there are many steps involved, each installation builds experience and efficiency. With the right preparation, professional expertise, and continued learning, achieving a flawless DON-BAR 9000 installation becomes a smooth and precise process.

Welcoming Hearth + Home Fireplace & Renovations – Calgary, Alberta

We recently had the pleasure of welcoming our customer, Hearth + Home Fireplace & Renovations from Calgary, Alberta, to our facility in Quebec.

During their visit, we toured the factory, presented an overview of our DON-BAR product line, and reviewed our manufacturing processes. We also worked together on quote preparation, product details, and opportunities to improve communication and workflow between our teams.

As part of our ongoing collaboration, we are launching a pilot project involving cathedral ceiling supports. This initiative is designed to simplify installations for their contractors, improve jobsite efficiency, and create a smoother installation experience.

We truly enjoyed spending quality time with Jason, Daniel, and Tim. Their professionalism, knowledge, and passion for the hearth industry made this visit extremely valuable.

We appreciated the opportunity to hear their perspective from the field and to continue developing DON-BAR products and solutions that better support our partners and their customers.

We look forward to strengthening this partnership and working together on future opportunities.

SOMETHING BIG IS COMING...

Exciting things are happening behind the scenes at DON-BAR. A new partnership is being prepared that will create exciting opportunities for dealers and customers across North America.
